## Discussion

There are two sample locations to the north of B776 that will need to be relocated because of major obstructions. These are:

- CF46-024      Statistical sample that will be relocated 3 feet east due to a large fixed piece of equipment (large fan) and will require concrete coring to penetrate the existing slab.
- CF46-025      Biased sample for the french drain (PAC 1100) that, as currently located, is inside B776. This will be relocated 5 feet north along the french drain to the outside of B776.
